CORPORATE OVERVIEW

Who we are and the value we create

ARSHTAT CO. is an engineering, procurement and construction-oriented company providing integrated solutions across engineering consultancy, procurement and material supply, construction management, design-build, project management and technical documentation.

Our multidisciplinary approach connects the employer's technical requirements with practical engineering, qualified suppliers, controlled execution and reliable delivery. We focus on solutions that are technically sound, commercially efficient and aligned with project schedule, budget and quality objectives.

VISION

To be recognized as a trusted engineering and project delivery partner known for innovation, quality and long-term value creation.

MISSION

To provide practical engineering solutions, reliable procurement, disciplined project management and safe, quality-focused delivery.

PROMISE

Quality, responsiveness and dependable delivery - from technical selection through final handover and support.

02

WHY ARSHTAT

Capabilities that reduce project risk

◆ Integrated engineering solutions

Technical, commercial and execution considerations are evaluated together.

◆ Professional project management

Planning, monitoring, reporting and interface management across stakeholders.

◆ Cost and schedule awareness

Solutions selected against budget, lead time, logistics and project priorities.

◆ Procurement expertise

Supplier identification, technical evaluation, quality control and delivery coordination.

◆ Quality-focused delivery

Clear specifications, inspections, documentation and traceable acceptance.

◆ Client-oriented approach

Responsive communication and continued technical support through completion.

03

CORE SERVICES

Integrated services across the project lifecycle

01 Engineering Consultancy Feasibility support, technical studies, specifications, design review, engineering coordination and technical advisory.	02 Project Management Project planning, scheduling, cost and progress control, reporting, risk management and governance systems.
03 Procurement & Material Supply Material sourcing, supplier assessment, technical bid evaluation, purchase coordination, inspection and logistics.	04 Construction Management Site coordination, supervision support, quality control, interface management, progress monitoring and handover.
05 Design & Build Coordinated design and execution solutions tailored to employer requirements, project constraints and available budget.	06 Tender & Contract Documentation Preparation of scope of work, technical specifications, BOQ/MTO inputs, tender packages and evaluation criteria.
07 Quality Assurance & Inspection ITP development, vendor inspection, material approval, nonconformance follow-up and quality documentation.	08 Renovation & Rehabilitation Assessment, redesign and execution management for residential, commercial and operational facilities.

04

DELIVERY MODEL

A disciplined path from need identification to support

1 NEEDS ASSESSMENT Scope, technical criteria, budget, priorities and schedule	2 TECHNICAL PROPOSAL Options comparison, risk review and recommended solution	3 PROCUREMENT & CONTROL Supplier engagement, purchasing, manufacturing and inspection	4 DELIVERY & SUPPORT Logistics coordination, handover, documentation and technical follow-up

SELECTED PROJECT EXPERIENCE

Representative assignments delivered by the company and its team

No.	Project	Client	Service	Year	Description
01	Commercial Complex Material Supply - Baghershahr	Private Client	Procurement	1399	Supply of more than 120,000 lightweight concrete blocks (20×20×40).
02	Daraloo Copper Mine Amphitheater	Daraloo Copper Complex	Engineering Consultancy	1400	Architectural, civil, mechanical, electrical, lighting and acoustic supervision.
03	Residential & Commercial Buildings - Rasht & Masal	Private	Construction	1400-Present	Construction of five residential and commercial buildings, generally 5-7 floors.
04	Tender Documents for Daraloo Copper Mine	Daraloo Copper Complex	Engineering Consultancy	1401	Tender documents, technical specifications and scope of work for administrative buildings, entrance structure, mine facilities and crusher area.
05	Villa Design & Construction - Fuman	Private	Design & Build	Ongoing	Design and construction based on the employer's functional requirements and budget.
06	Technical Procurement Consultancy	Kayson Company	Engineering Consultancy	1401-1402	Procurement consultancy and technical specifications for projects in Iraq, Isfahan and Mashhad.
07	Mine Boundary Wall Tender Documents	Daraloo Copper Complex	Engineering Consultancy	1404	Tender documents and scope of work for the mine perimeter wall.
08	Residential Apartment Renovation - Rasht	Private	Construction	1405	Interior renovation tailored to the client's requirements and approved budget.
09	7 km Bypass Road Asphalt Project	Daraloo Copper Complex	Engineering Consultancy	1405	Tender documentation and scope of work for road rehabilitation and asphalt works.
10	Tehran Metro Project Management System	Tehran Metro	Engineering Consultancy	1404	Analysis of existing processes and implementation planning for an integrated project management system.

06

TECHNICAL & MANAGEMENT CAPABILITIES

Competencies supporting reliable project delivery

ENGINEERING • Requirements definition and scope clarification • Technical specifications and design review • Multidisciplinary engineering coordination • Value engineering and option assessment	PROCUREMENT • Supplier and manufacturer identification • Technical bid evaluation and comparison • Inspection, expediting and quality follow-up • Logistics, delivery and document control
PROJECT MANAGEMENT • Planning and scheduling • Progress measurement and reporting • Risk, issue and interface management • PM system and procedure development	QUALITY & DELIVERY • Quality planning and ITP development • Material submittal and approval follow-up • Inspection records and handover dossiers • Client coordination and post-delivery support

07

SECTORS SERVED

Flexible expertise across diverse project environments

Building & Real Estate	Mining & Mineral Processing	Urban Infrastructure & Metro
Roads & Site Development	Industrial Facilities	Renovation & Rehabilitation

Our objective is simple:

to convert project requirements into clear, controlled and dependable results.

LET'S BUILD VALUE TOGETHER

Engineering insight. Procurement discipline. Reliable delivery.
